

5-GALLON BUCKET PALLETIZER

EDR Inc. has custom designed, built and installed an automated Bucket Palletizer that Promotes Safety while Reducing Labor. In this application 5-gallon - 40# buckets that are 350 degrees are fed onto our conveyor where we rotate them for orientation and then convey them to a 4-bucket pick-up station. The current design places 4 buckets on one of two pallet sizes either 3 or 4 wide by 1 or 3 levels high in an explosion proof area. This can be designed to handle most other types of containers including boxes as well as non-explosion proof areas. Fill in the Request for Quote/Data Sheet on the reverse side and fax to us for your quote.
